

RITESH KUMAR SHARMA

ritesh224172@gmail.com | 6386606277 | AYODHYA (U.P)

OBJECTIVE -

Motivated Software Development Intern currently working with the development team at Inverted Energy Pvt. Ltd., providing technical support for internal software applications and GUI-based desktop tools. Skilled in Python, ASP.NET (.NET Framework), SQL, HTML, CSS, Bootstrap, and JavaScript, with hands-on experience in working with MySQL databases and implementing CRUD operations within applications. I am passionate about learning modern technologies and improving my development skills while contributing to real-world software projects. I am also exploring cloud technologies with Amazon Web Services (AWS) and practicing problem solving on LeetCode to strengthen my programming and algorithmic thinking.

WORK EXPERIENCE & PROJECTS

Inverted Energy Pvt. Ltd., software team

09/2025 – current | Noida U.P

- Providing technical support and troubleshooting for **Python-based GUI desktop applications**, resolving user interface and functionality issues.
- Assisting in the **design and development of desktop applications** for internal tools such as battery testing, system monitoring, and data analysis.
- Developing and learning **Python GUI desktop applications** with integration of databases and external APIs to improve system workflows.
- Implementing **secure CRUD operations (Create, Read, Update, Delete)** within application interfaces to manage system data effectively.
- Working with **MySQL databases**, writing SQL queries for data storage, retrieval, and application integration.
- Assisting in development of **barcode generation systems** for battery and BMS tracking using Python and thermal barcode printers.
- Supporting development of applications used for **battery test data analysis**, including filtering data, generating reports, and visualization.
- Exploring integration of **Google Drive APIs** to enable secure file management and data operations within desktop applications.
- Using **GitHub** for version control and collaborative development with the software team.
- Learning and exploring **Amazon Web Services (AWS)** for cloud-based deployment and storage solutions.
- Maintaining **technical documentation, workflows, and feature notes** for ongoing software development projects.

Techpile Technology Pvt. Ltd. Lucknow, ASP.NET Programming (training)

28/06/2024 – 30/10/2024 | lucknow U.P

- Completed professional training in **ASP.NET** & **development using Microsoft Visual Studio**, focusing on building dynamic and database-driven web applications.
- Developed and practiced **web application development** using HTML, CSS, JavaScript, Bootstrap and ASP.NET & framework.
- Learned and implemented **backend logic, form handling, and database connectivity** in ASP.NET & applications.
- Worked with **Python programming** for basic scripting, automation tasks, and foundational machine learning concepts.
- Used **GitHub** for version control, managing repositories, committing code changes, and collaborating on projects.
- Practiced **JavaScript programming** for improving interactivity and user experience in web applications.
- Learned to write **effective AI prompts** for generating development solutions, improving productivity, and assisting in coding tasks using AI tools.
- Participated in hands-on projects and exercises to understand **full development workflow**, debugging, and problem-solving techniques.
- Gained practical experience in **software development practices, code organization, and project documentation**.

EDUCATION -

Diploma in Computer science and Engineering,

Government Polytechnic Aadampur Tarabganj Gonda
BTEUP BOARD-77%

2025

Intermediate (PCM), K.D Public Inter College Ayodhya

UP BOARD-76%

2022

BTECH in Computer science and Engineering (Pursuing),

Delhi Institute of Engineering and Technology Meerut

TECHNICAL SKILLS

: Programming Languages: Python, Structured Query Language (SQL), JavaScript, C Programming | **Backend Development:** ASP.NET & (.NET Framework), Basic Python programming | **Frontend Development:** HTML5, CSS3, Bootstrap, JavaScript, React.js (Basic) | **Desktop / GUI Development:** Python GUI Development (PyQt – Learning) | **Databases:** MySQL, DBMS Concepts | **Web Skills:** HTML, CSS, JavaScript, Bootstrap | **Machine Learning & Computer Vision (Basics):** Natural Language Processing (NLP), NLTK, OpenCV, Basic ML Concepts | **Problem Solving:** Data Structures & Algorithms Practice (Regular problem solving on LeetCode) | **Tools & Operating Systems:** Windows, GitHub, Visual Studio, Visual Studio Code | **Cloud & DevOps:** Amazon Web Services (AWS – EC2, S3 Basics – Learning), Docker (Learning), Nginx (Basic / Learning) | **Desktop & Utilities:** CRUD Operations, Software Troubleshooting, Technical Support | **AI & Automation:** AI-assisted Development, Writing structured prompts for code generation, debugging, and development support using AI tools.

PROJECT -

Learning Management System (LMS) website

A LMS is a software application designed to facilitate the creation and management content.

College Management System (CMS) website

Face detection

Detect your face my machine learning.

Eye detection

Detect your face my machine learning.

Tic-Tac-Toe game

Game by machine learning.

Chatbot

Chatbot by machine learning.

Screen Recording system

Screen recording system by machine learning. Etc.
